

Sprint 1 Review

in list **SCRUM DOCUMENTATION**

Notifications

Start date

 **Watch****18 Aug** 

Description

Meeting: Sunday 18th

None absent

Prototypes still work in progress. Menu Prototype done, Reservations done.

APIs:

Meal credit: preliminary done

Menu: done

Need to confirm how to do financial account and payment details. Proposal: mock under assumption that payments handled by Wits.

Ongoing discussion about public APIs. Ensure this discussion is recorded in case other group asks for APIs late.

Investigation into collaboration on Swagger.

APIs for dietary requirements: GET by dietary tag.

API for reservation: GET restaurant details, GET availability, DELETE reservation, etc

User stories: Menu, Feedback, done. Dietary requirements, reservations to complete

Dietary requirements core feature: Menu items must have tags.

Additional features: Search menu items and automatically assign tags. Make custom orders during reservation.
